As a manufacturers of thermoplastic road marking material. We provide 100% Solid Environmentally & user safe compound containing pigments, glass beads, binder & filler which become liquid when heated. In liquid form, the thermoplastic may be applied using standard industry applicators.

We Comply Following Standards

- Morth 803
- BS 3262:1989
- BS EN 1871:2000
- AASHTO M249

PROPERTIES	WHITE	YELLOW
	ALPHA	ALPHA
Day Light Luminance (at 45°C)	>75%	>70%
Drying Time	7 Min.	7 Min.
Cracking Resistance at Low Temperature	Pass	Pass
Softening Point	105°C	105°C
Flow Resistance	10%	10%
Yellowness Index	0.07	-
Skid Resistance	65	65

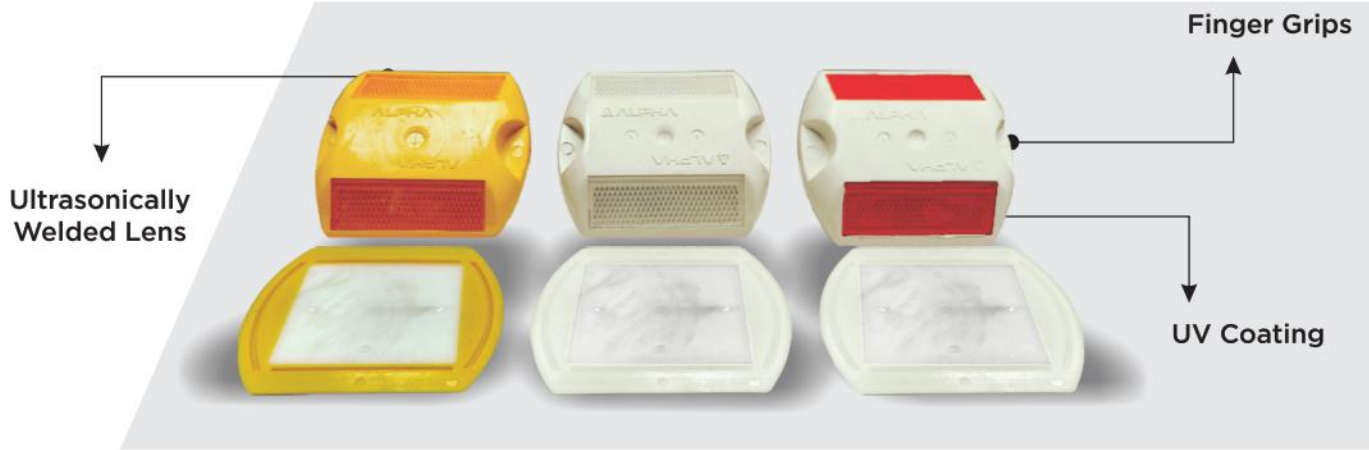

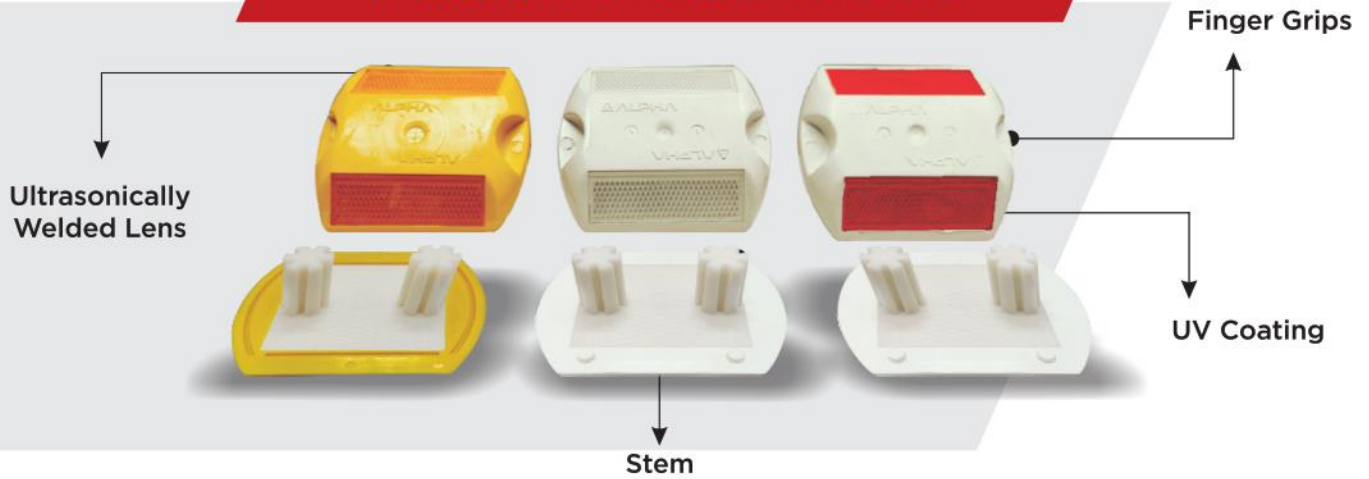

THERMOPLASTIC ROAD MARKING

PAINT

A raised pavement marker is a safety device used on roads raised reflective markers include lens or sheeting that enhance their visibility by reflecting automotive headlights. Some other names for specific types of raised pavement markers include cats eyes, road studs or road turtles. Sometimes they are simply referred as reflectors.

Plastic Road Studs

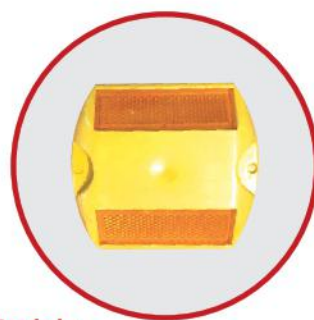

High impact thermoplastic body | Ultrasonically welded lens | High impact polycarbonate lens
 Plain and shank available | Meet ASTM standard | ARAI Standards

ANTI GLARE BOARD

Anti Glare Board is used to solve the glare of the headlights which can be a huge factor to blind the drivers & cause accidents.

These help improve traffic safety and also could beautify the highway landscape. Anti-Glare screens on the roads are road sections with dangerous & sharp turns, accidents at dusk & at night, unfavorable terrain.

Model : AC-AG-100
